

# BACKUP

## Managed Cloud Backup & Recovery

Best-in-breed Backup and Disaster Recovery service for a single monthly payment

Data is the beating heart of most modern businesses. With the threat landscape constantly evolving its critical for companies to protect their most valuable asset. Let Probrand take the headache out of managing this critical business requirement.

Managing backups in-house is complicated, time consuming and costly, but automated Cloud Backup and DR gives you confidence that your data will be backed up securely and can be restored instantly should the worst happen. For a single monthly payment Probrand will manage your backups, monitor the protection of your data and be on hand when the inevitable happens and a disaster or cyberattack strikes.

### Features and Benefits

Our unique, best-in-class data protection service offers the following features:

- **Fully Managed** - Outsourced Backup and DR service that is installed, monitored, and supported by Probrand.
- **Business Continuity\*** - Enables companies to continue to operate in the event of disaster or cyberattack, minimising downtime and financial cost.
- **Rapid Recovery\*** - Regardless of the cause of unplanned downtime, Probrand's DR service can get your servers online in under 15 minutes.
- **365/24/7 Cover\*** - 24/7 support in the event DR is required.
- **Annual DR test\*** - DR testing in an isolated environment to confirm application availability, ensure compliance, and prove DR readiness — without any impact on production systems.
- **Backup Protection** - Ensuring backups cannot be encrypted or deleted in the event of a ransomware attack.
- **Greater recovery points** - Backup critical data every 15 minutes minimising any data loss.
- **Scalability** - The service is highly scalable allowing customers to easily add or remove resources as the business changes. This flexibility means DR infrastructure grows as your business grows or changes without the need to invest in additional infrastructure.

### Peace of Mind

- **Cost Saving** - Managed Cloud Backup and DR is more cost-effective than traditional on-premises solution as it requires less hardware, infrastructure and specialist in-house knowledge.
- **Data encrypted and password protected** - Backups encrypted using AES-256 encryption algorithms, in transit and at-rest and SSL encrypted channels.
- **Secure UK data centres** - Your data will be held in secure local hosting facilities.
- **Data Protection** - Cloud backup and DR provides reliable and secure backup and recovery of critical data, protecting it from loss or theft.
- **Compliance** - Helps companies meet regulatory, insurance and compliance requirements e.g. GDPR

### Save Time and Money

- Flexible monthly billing with the ability to grow and shrink in line with business needs.
- Reduced management costs.
- Optimised to provide maximum security and maximum performance.
